EKA to invest ₹800 crore this financial year to expand production capacity and ensure timely delivery of buses to state governments and private operators

**EKA Mobility signs MoU with** SBI for EV Financing
To Promote Electric Commercial Vehicles in India

#### KNOWLEDGE CENTRE

Our chairman shares his views on how the latest GST reforms are a turning point for India's mobility & manufacturing ecosystem.

"We appreciate the government's forward-looking GST reforms, which will provide a strong impetus to India's mobility and manufacturing sectors. The decision to reduce GST on auto components from 29% to 18% is a particularly welcome step, as it will ease cost pressures on the automotive supply chain, enhance efficiencies, and provide much-needed relief to manufacturers and OEMs. This move will particularly support critical segments such as ambulances and specialised vehicles, ensuring greater accessibility and affordability of essential transport solutions. At the same time, the reforms will accelerate the adoption of electric commercial vehicles, driving indela's transition towards sustainable, efficient, and self-reliant mobility.

The Super Tax Rational Instance of the Commercial specific control of the control of the

The Super Tax
Rationalisation Exercise is
a positive signal reflecting
a broader momentum that
can pave the way for
sustained high growth.

Overall, this rationalisation nforces confidence, stimulates novation, and positions india strongly on the path to becoming a global hub for future-ready transportation."
