

INDIA'S LARGEST RANGE OF EVCV

Making Electric Mobility Sustainable & Profitable

#BharatKiEVCV

#BharatKiEKA

Powering a Sustainable Electric Ecosystem

EKA, meaning 'One' in Sanskrit, symbolises unity and collaboration. It represents our commitment to inclusive growth by creating a robust electric vehicle ecosystem. From advanced design and manufacturing to global distribution and services, EKA is leading the charge in making sustainable commercial mobility more accessible and profitable on a global scale.

We are enhancing the viability of electric commercial vehicles, empowering businesses and communities to transition to cleaner, smarter transportation solutions.

The Essence of EKA

Our Vision

To become a global volume leader in commercial electric vehicles.

Our Mission

To bring new mobility solutions that accelerate development and benefit businesses in a sustainable manner.

Our Values

Environment Focus

Conscious Innovation

Reliable Mobility

#BharatKiEKA

Our vision is to lead sustainable mobility in India with the largest portfolio of pure electric commercial vehicles.

We are committed to developing eco-conscious commercial vehicles tailored to global needs.

#BharatKiEKA prioritises reliability, adaptability, cost-efficiency, and environmental sustainability. This initiative enables businesses to thrive in a cleaner, smarter, and more sustainable future for the nation and the globe.

EKA Truck Range

EKA 55T

Built for More: Delivering Heavy-Duty Logistics Sustainability

Built for heavy-duty logistics with high efficiency and reliability, the EKA 55T is compatible with multiple trailer configurations for versatile cargo movement.

Applications: Container logistics, bulk cargo transport, tankers, industrial haulage, and long-haul freight movement.

EKA 55T 4x2 Tractor

Build For More: Delivering Heavy-Duty Logistics Sustainably

EKA 55T offers unmatched efficiency and reliability. Designed for maximum impact, the EKA 55T 4X2 tractor can be paired with a range of trailers, from flatbeds to containers, for diverse cargo needs.

Applications: Bulk cargo transport, tankers, industrial haulage, and long-haul freight movement.

EKA Bus Range

EKA COACH

Smart and Efficient, Engineered for Comfort

Smart, efficient, and engineered for comfort, the EKA Coach is engineered for luxurious long-distance travel with advanced technology and zero-tailpipe emissions for a smooth, sustainable journey.

Applications: Intercity travel, tourism, and premium passenger transport.

EKA Bus Range

EKA Tarmac Coach

Airport-Ready Performance Built for High-Capacity Movement

Purpose-built for efficient airport operations, the EKA Tarmac Coach combines a durable monocoque body with heavy-duty construction for seamless high-capacity passenger movement.

Applications: Airport passenger transfer, tarmac operations, airline crew movement, and terminal connectivity.

EKA LOW-FLOOR

Eco-friendly Operation Combined with Peak Efficiency

Built for modern urban transit, the EKA Low-Floor bus offers seamless accessibility, spacious interiors, and a smooth ride experience with zero-tailpipe emissions.

Applications: City public transport, BRT systems, airport mobility, institutional campuses, and urban shuttle services.

EKA Bus Range

EKA 12M

Pure-Electric Environment Conscious Commutes

A next-generation city bus designed for sustainable mobility, the EKA 12M combines passenger comfort, modern technology, and zero-tailpipe emissions for everyday urban travel.

Applications: Public transportation, intracity mobility, airport connectivity, employee and campus transport, and feeder services.

EKA 9M

Maximum Comfort, ZERO Tailpipe Emissions

Compact, agile, and built for urban mobility, the EKA 9M delivers a comfortable passenger experience with spacious interiors and zero-tailpipe emissions.

Applications: Intracity transport, municipal transit, campus mobility, airport shuttles, and last-mile connectivity.

EKA Bus Range

EKA 9M School Bus

Safe by design. Comfortable by nature. Clean by technology.

Built with safety and comfort at its core, the EKA 9M School Bus delivers a quiet, smooth, and zero-emission travel experience for modern school mobility.

Applications: School bus fleets, educational institutions, campus connectivity, and student transportation.

EKA 7M

Small in Size, Big on Efficiency

Compact, agile, and built for challenging urban routes, the EKA 7M delivers clean electric mobility with smooth manoeuvrability and dependable daily performance.

Applications: Feeder services, last-mile connectivity, hilly terrain routes, narrow-lane transit, and urban shuttle operations.

■ EKA SCV Cargo Range

EKA 3.5T, 2.5T, 1.5T

Versatile, Efficient, and Sustainable Cargo Solutions

Available in multiple cargo body variants, the EKA electric cargo range is designed to support diverse logistics operations and needs.

Applications: Urban and mid-mile logistics, last-mile delivery, e-commerce delivery, warehouse logistics, FMCG distribution, last-mile transport, and intercity cargo movement.

EKA 3W CARGO

Combining Agility with Sustainable Performance

A compact electric 3-wheeler cargo vehicle designed for agile urban logistics. Featuring a spacious driver cabin, it delivers a clean electric performance for light transport needs.

Applications: Last-mile delivery, e-commerce logistics, courier services, FMCG distribution, and light cargo transport.

■ EKA SCV Passenger Range

EKA 6S

Environment Friendly Last Mile Connectivity

India's first electric 3-wheeler with a steering wheel for passenger mobility, the EKA 6S features a driver + 6 seating configuration. The EKA 6S is designed to facilitate comfortable shared travel and intermediate public transport.

Applications: Last-mile mobility, public transit, feeder routes, intra-city commuting, and passenger shuttle services.

EKA 3S

Smooth, Sustainable & Reliable Last-Mile Connectivity

A modern electric passenger 3-wheeler designed for everyday city travel, the EKA 3S combines compact agility, passenger comfort, and intelligent control through EKA IntelliTwist™ regenerative throttle technology.

Applications: Last-mile connectivity, city commuting, shared mobility, neighbourhood transport, and passenger shuttle services.

EKA IntelliTwist™

Har Twist Samajhdaar

India's Most Intelligent Dual-Direction Throttle for Electric 3-Wheelers

-  More Energy Recovery

One Throttle.
Multiple Intelligent Functions.

EKA Connect is a fully integrated, AI-driven telematics and fleet intelligence platform, seamlessly integrated into every EKA electric truck—transforming operations from reactive to predictive.

OPERATIONAL ADVANTAGE

- Up to 20% higher fleet utilisation
- Reduced downtime through predictive diagnostics
- Improved route and energy efficiency
- Lower total cost of ownership (TCO)
- Enhanced vehicle uptime and reliability

Remote Diagnostics & Alerts
Instant fault detection, automated alerts, and remote troubleshooting reduce service delays and minimise manual intervention.

Real-Time Fleet Intelligence
Live monitoring of battery health, energy consumption, vehicle performance, and location—ensuring complete operational visibility at all times.

Battery & Thermal Safety Monitoring
Continuous tracking of battery parameters with predictive alerts for thermal risks—enhancing safety and reliability.

Predictive Maintenance (AI-Powered)
Advanced analytics anticipate faults before they occur, reducing unplanned downtime and improving vehicle availability.

WHO BENEFITS FROM EKA CONNECT

Fleet Owners & Operators

Complete fleet visibility & up to 20% higher utilisation

Drivers

Real-time alerts & safer driving experience

Logistics & Transport Partners

Optimised routes & improved service reliability

OEM Intelligence (EKA Advantage)

A continuous feedback loop enabling smarter engineering & next-gen vehicle development

BUILT FOR SCALE

EKA Connect is a cloud-enabled, platform-first solution designed to scale seamlessly across:

1 VEHICLE VOLUMES

Easily extendable from small fleets to thousands of vehicles through cloud-native architecture

2 GEOGRAPHIES

Supports multi-country and multi-city deployments with standardised data frameworks

3 USE CASES

Adaptable across buses, trucks, and small commercial vehicles without requiring major system changes

Operator Dashboards

Customisable dashboards provide actionable insights for faster, data-driven decision-making across fleets.

From India to the World

EKA's commercial vehicle ecosystem is crossing borders — establishing CKD assembly partnerships, distribution agreements, and live export orders across Africa, Oceania, and the Middle East.

INTERNATIONAL PARTNERSHIPS

Ethiopia Eastern Africa

Kerchanshe PLC

Through a strategic partnership with Kerchanshe PLC, EKA is establishing a CKD assembly plant in Ethiopia for buses, trucks, and SCVs — alongside a full service network and distributorship covering the Eastern African corridor.

Zanzibar Eastern Africa

Schmidh & Heine & GRT

EKA has entered a distribution agreement in Tanzania and Zanzibar covering buses and SCVs. The first consignment of 15 twelve-metre buses has already been dispatched — with a further 35 units confirmed and pending shipment.

Australia Oceania

NBFI Capital

In partnership with NBFI Capital, EKA is developing a CKD bus assembly plant in Australia — supported by a national distributorship network to introduce EKA's electric bus portfolio to the Oceania market.

EKA'S SMART LEAN FACTORIES

BUILT TO MOVE INDIA

Three precision-engineered facilities. One unified mission — to electrify India's roads at scale. From compact freight to city transit, EKA's manufacturing ecosystem is purpose-built for the next era of mobility.

Design & Manufacturing Philosophy

At EKA, our design and manufacturing philosophy is centred on efficiency, sustainability, and innovation. We focus on delivering world-class products that are cost-effective, adaptable, & environmentally responsible.

- **TCO-Centric Design:** Balancing affordability with long-term sustainability.
- **Sustainability Focus:** Reducing waste and environmental impact with efficient manufacturing.
- **Smart Lean Factory Approach:** Maximising efficiency and scalability and minimising carbon footprint.
- **Fostering Inclusive Growth:** Leveraging our modular architecture for quick customisations and driving collaborative solutions.
- **Adaptability for Optimisation:** Optimising TCO for varying use cases.

Group Synergy

EKA is part of a dynamic group of companies that includes Pinnacle Industries, Instor India, and VDL Pinnacle. Each company brings unique strengths to the table, creating synergies that will drive innovation in electric commercial mobility.

Pinnacle Industries is India's largest manufacturer of commercial vehicle seating and interior systems, and India's largest producer of special application vehicles.

Instor India is the leading manufacturer and exporter of storage solutions and metal fabrication systems, delivering best-in-class products, including bus structural parts.

VDL Pinnacle is known for its expertise in building smart, lean factories that optimise production efficiency and innovation.

The EVCV Impact

Fuel Cost Savings
200 Cr

Equivalent to
1.7 Cr
Trees

Diesel
Avoided

2.3 Cr Litres

Passengers
Benefitted Daily

6 Lakh

Reduction in Tailpipe Emission

4.2 Lakh Ton CO₂

(The average yearly benefit if 1000 electric buses replace 1000 diesel buses with a daily run of 200 km.)

The Road Ahead

- To become a **global volume leader** in commercial EVs
- Continue developing **adaptable and modular** vehicle platforms
- Lead the way in sustainable manufacturing by achieving **carbon neutrality**
- Advance proprietary **EV technologies** for smarter, safer, and more efficient vehicles
- Build **regional ecosystems** to support economies and reduce environmental impact
- Partner with governments and industries to **accelerate global EV adoption**
- Make electric mobility **accessible by lowering** Total Cost of Ownership (TCO)
